

Single Solution - Entire Business

COMPANY PROFILE

www.revollims.com

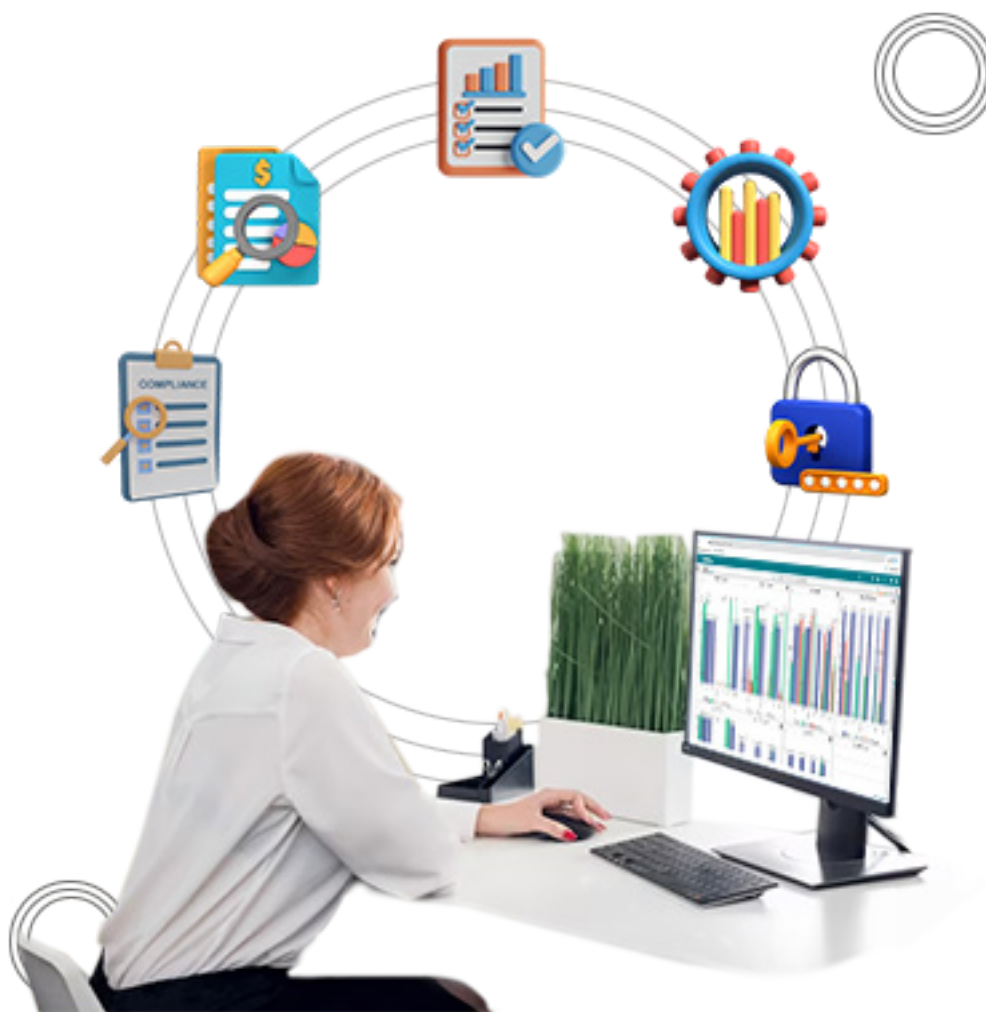

WHO WE ARE

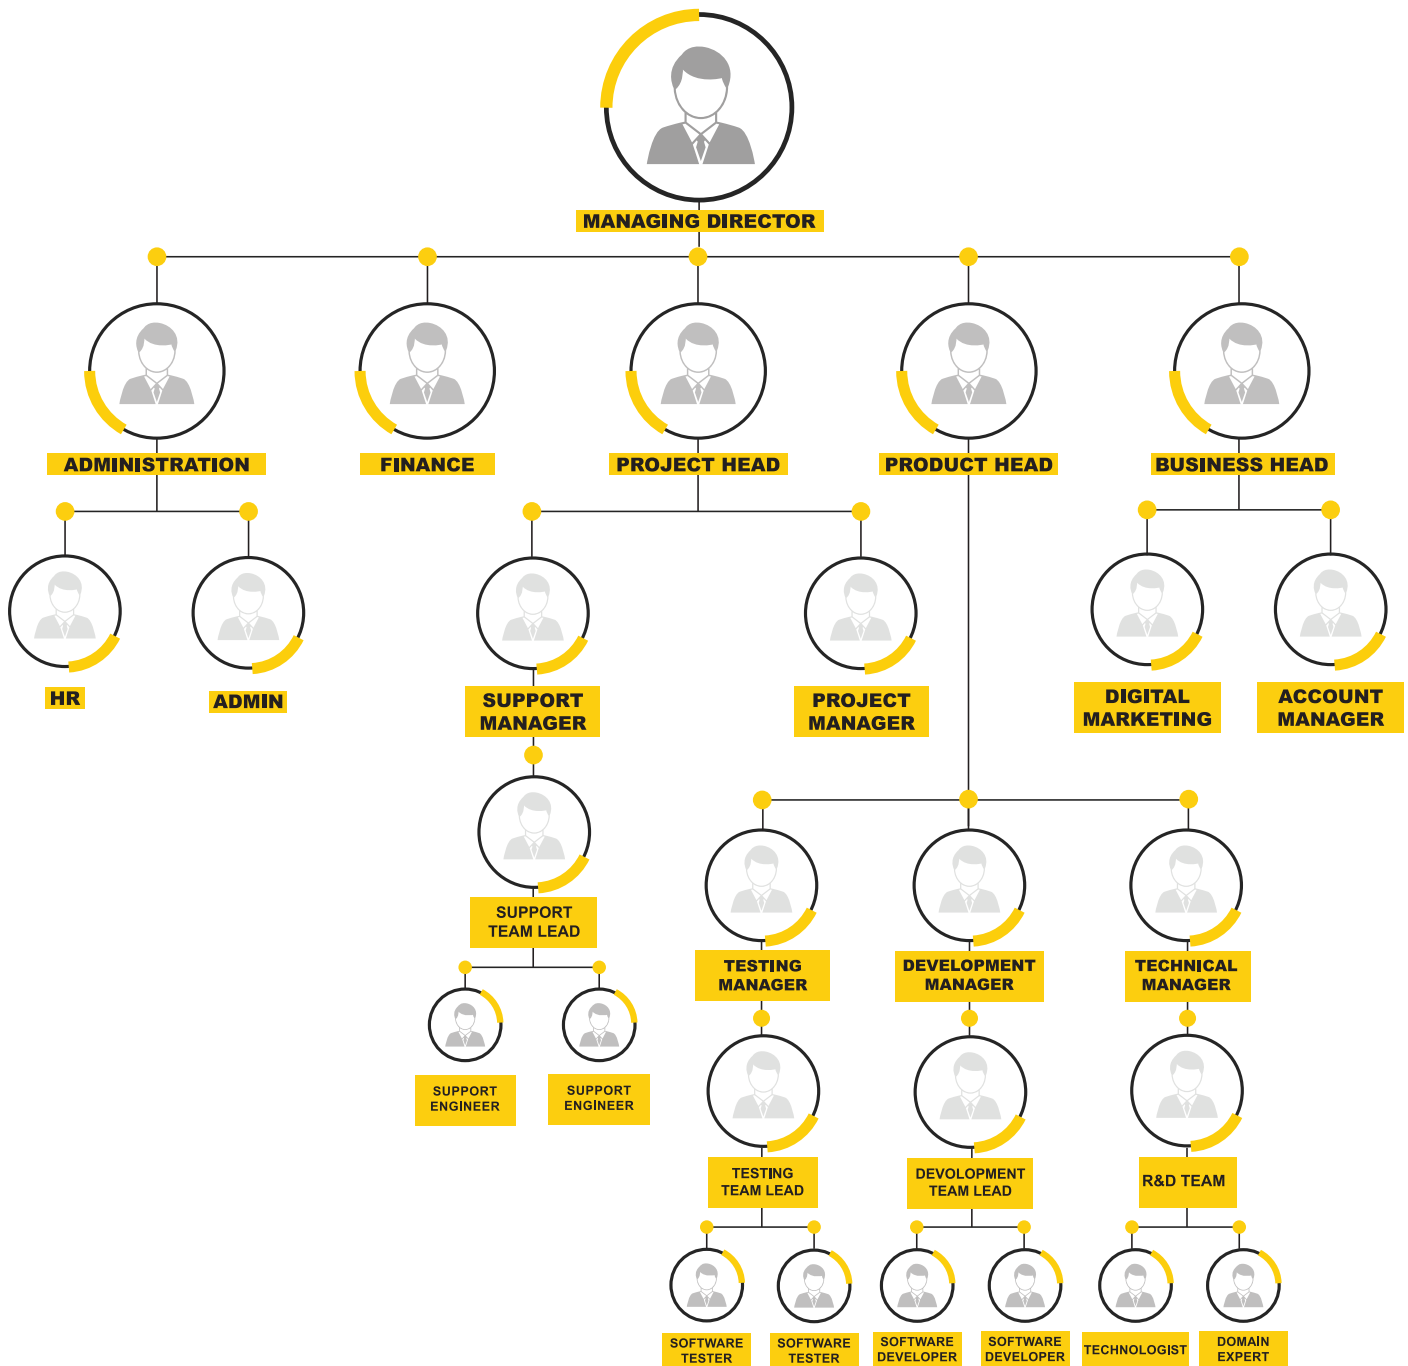

Revol was founded by a group of professionals having more than twenty five years of experience from varying industry verticals that were leveraging science to develop products. Revol came into existence with a vision to be a trusted software and services provider to process-based industries.

The promoters realized that with growing regulatory compliance process-based industries face constant challenges in maintaining and managing data generated. The motivation was the need for a platform which are quick to deploy, easy to adapt, and reasonably priced to motivate industries to migrate into a more digitalized operations environment, offering them the advantage of efficiency and productivity improvement.

Revol Process Solutions Pvt. Ltd. has developed a web-based integrated business solution for enterprises that can now commit to operational process automation and information management but, at a fraction of the cost and complexity.

TEAM HIERARCHY

REVOL CORE TEAM

The core team boasts of an average industry experience of over 18 years in between each other and has been together in Revol for over 8 years. All of them have been associated with Software organizations that were either into product or services. The cumulative experiences and the hunger to keep on the top of the game keeps them motivated in building Revol's Product offerings and service support.

They have been a strong team players and have together addressed product development challenges and built a strong product which is independent and well supported. The team has ensured all the due care has been taken while building the solution so it could not just perform well but also meet all the stringent regulatory requirements.

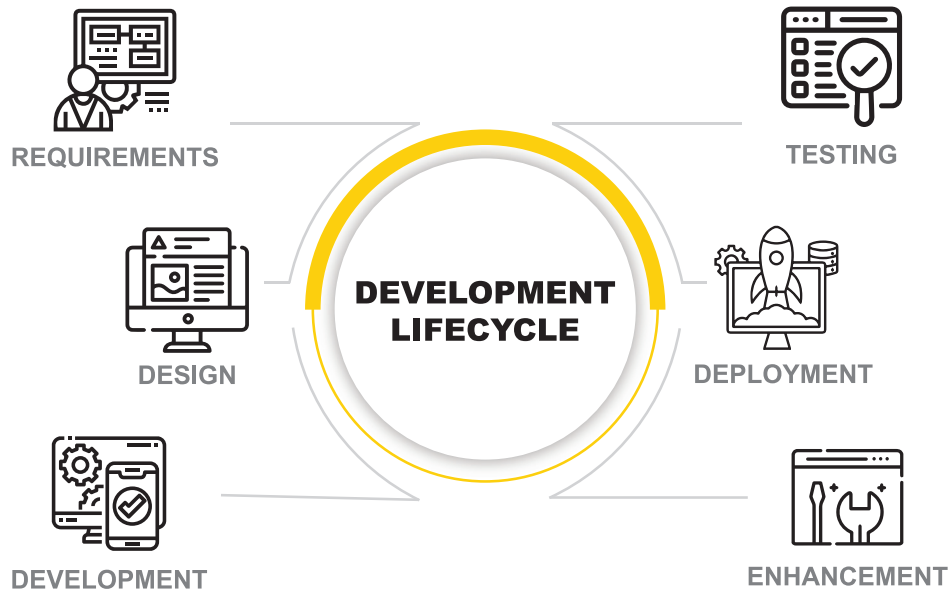

The product has been well received and found acceptance in industries like Oil & Gas, Petrochemicals, Testing, Pharmaceuticals, Environmental, Metals & Mining and Sequencing Laboratories. Revol LIMS is built in such a way that it can be expanded into different industry verticals with more of configuration and minimum customization.

The core team is all about problem solving skills and effective utilization of collective experiences to develop and deliver solutions to different customers and supports the same proactively,

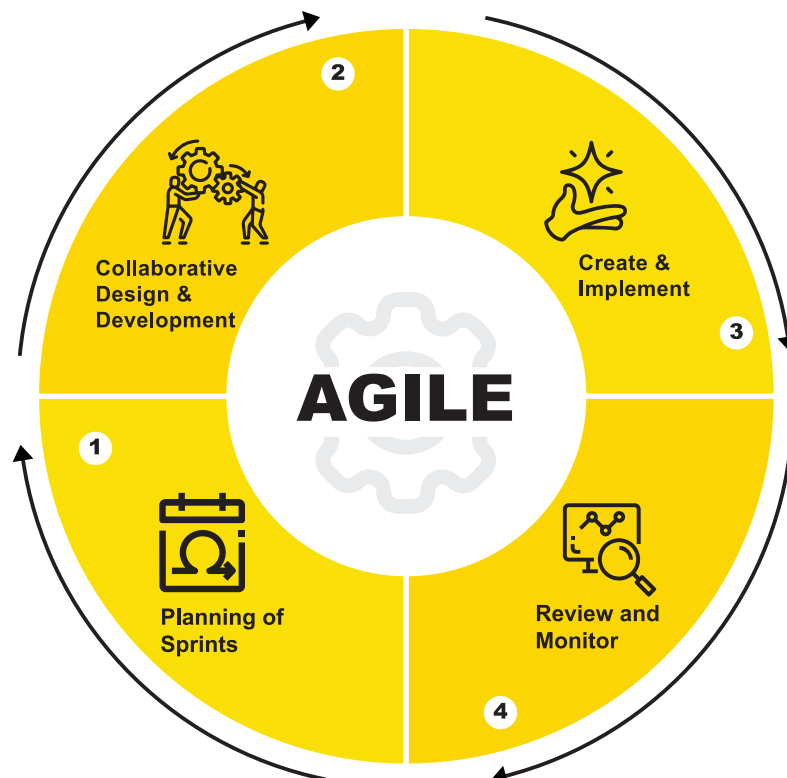

The core team comprises of Product manager, Technical manager, Dev Ops Consultant, Testing manager, Delivery manager, Support manager.

SOFTWARE DEVELOPMENT CYCLE
